

# Sonos™ ZonePlayer (ZP80)

Make all of your audio devices part of a wireless, multi-room digital music system.

Now you can play all your favorite digital music, all over your house, on all your favorite audio equipment—your home theater system, powered speakers, stereo, and more. Just connect a ZP80 to any amplified audio device in any room, and that device is instantly and seamlessly part of a wireless, multi-room digital music system. Which means you can use the full-color Sonos™ Controller to control all your music, and all your rooms from the palm of your hand. You can also use a ZP80 to retrofit a conventional audio system with home-run speakers or as a wireless extender to increase the wireless range of your Sonos system.

No matter where or how you use the ZP80, the digital and analog outputs will deliver superior sound to every room. And because the ZP80 is so compact, you can put it just about anywhere. You can connect up to 32 ZonePlayers throughout your house—combining the ZP80 and the ZP100 with built-in amplifier—for the ultimate in multi-room music.

# Sonos™ ZP80 Specifications

## Sonos™ ZonePlayer (ZP80)

Play all your digital music on your home theater, powered speakers, stereo, and more.

### Features

Wireless, multi-room digital music	ZonePlayers can go anywhere and connect wirelessly when a wired Ethernet connection is not available. ZonePlayers and Controllers will establish their own secure wireless mesh network. Play the same song in different rooms, or different songs in different rooms—simultaneously. <i>The first ZonePlayer you install must connect to your home network using a standard Ethernet cable.</i>
Home theater integration	Designed to connect to an external amplifier, the ZP80 seamlessly integrates your home theater and other audio devices into your Sonos multi-room digital music system.
Analog and digital audio output	Enjoy your music anywhere by connecting to your home theater receiver or amplifier with analog, optical and coaxial digital audio outputs. We also provide fixed or variable audio output volume control.
Analog input with digital encoding	Music from an external audio source (such as a CD player, radio or MP3 player) can be connected to a ZP80 and played by all ZonePlayers in the system.
Easy set up	Automatic wired or wireless set up. Add new ZonePlayers with one button-press.

### Technical Specifications\*

Sound quality	THD+N < 0.02%, 20-20kHz
Line-out connections	Analog (RCA), optical and coaxial digital audio outputs
Line-in connections	Analog (RCA), auto-detecting
